Summary

Software engineer with a broad skill set for developing software solutions and the necessary experience to deliver successful projects from ideation to completion. Particularly experienced in working with teams in an Agile environment and collaborating with specialists for efficient and timely project completion.

Work Experience

Software Developer – Beeholder BV (Netherlands)

September 2021 – July 2023

- Developed software with a focus on mobile applications, software architecture, server tools and classification algorithms.
- Collaborated on projects with local municipalities and government organisations.

Project Experience

Bike Helmet Counting – Provinsje Fryslân (Netherlands)

February 2024 – September 2024

- Collaborated with the Friesland province of the Netherlands to automate cyclist and helmet counting for statistical purposes.
- Improved state-of-the-art object detection and tracking model accuracy by 25% and reduced false positive counts by 30%.

X-ray Contraband Detection – OD Security BV (Netherlands)

September 2023 – February 2024

- Collaborated with OD Security BV to automate detection of contraband in human X-rays.
- Developed a method of adding synthetic anomalies to X-ray scans for testing.

EnergieKnip – Beeholder BV (Netherlands)

September 2021 – July 2023

- Collaborated with the municipality of Emmen to survey and encourage the use of energy-saving electronics.
- Developed an application that allowed users to anonymously submit energy usage data and facilitated transactions between users, retailers and the municipality.
